

Self-Improvement Assessment – Panel’s feedback CARE International June 2018

Overarching Assessment	Score from 1 (lowest) to 5 (highest)
Convincing evidence that all key decisions taken in the organisation are based on sound knowledge of, and are responsive to, stakeholders.	3
Evidence that key stakeholders are well identified, continuously included in relevant stages of work, and have shown good engagement and ownership.	3 The Panel felt this was a 3 rather than a 4 because of the acknowledged variation in standards of transparency - which is the foundation for meaningful stakeholder engagement
Overall evidence that the organisation has effective and responsible governance and management (i.e. is well-run).	4
A sound plan for improving weak areas and clarity on objectives, resources and cross-organisational responsibilities for implementation.	3

Traffic Light Assessment	Score: Red, Amber, Green
Cluster A: Impact Achieved	
Cluster B: Stakeholder Involvement	
Cluster C: Organisational Effectiveness	

The Panel appreciates the comprehensive traffic-light assessment CARE provided for each reporting question. However, as the reporting framework only requires this self-assessment at cluster level, the Panel has provided its ratings on each of the three clusters.
